

I would like to comment of behalf MB Docket #04-233 regarding "Localism" of radio stations. I am concerned the the LPFM initiative to expand LPFM radio system will impact national and regional radio services that are carried to my remote Colorado location via translators. By given LPFM priority over these FM translator services, I am concerned that the radio station, K-LOVE, will no longer provide a positive message to my local community that would not be available without the translator services being used by K-LOVE. K-LOVE is a regional station that allowed my family to make an easier transition when I lost my job in Denver and relocated to the Craig, CO area. It provided a familiar "home" station that we all had listened to in Denver up in Craig. It was monumental in assisting my kids in a very difficult move and continues to reenforce a "normalacy" to this day.

If K-LOVE were displaced by an given preference to an LPFM broadcaster, we would have no option to listen to comtempoary Christian music on any station in the region. I feel so strongly about the message, the minsitry, and the service provided by K-LOVE to my family and the community of Craig, CO that I financially support this station and have so for the past 4 years.

I believe that the Christian message that promotes caring for others, provides assistant services to the community, and presents a wholesome message and music that appeals to my generation and my kid's generation is vital to the health and wellbeing of my community and is in the best interest of the public.

I ask that you do not move forwards with proceeding 04-233. I believe there are better ways to encourage and promote LPFM without hamstringing those statitions that current exist.
